Profile summary

A self-driven, proactive worker with a passion for IT and software development. I switched careers in 2018 to pursue my longtime passions. Since then, I have been learning new skills and building software every year.

- The beginning of my career was as a QA tester, but soon I became interested in web development, learning WordPress, and getting into coding.
- The main focus of my studies of web development has been what today is called Front-End stack: HTML, CSS, Bootstrap, and JavaScript (ES6). Using these skills, I have created multiple websites and UI's to gain professional experience.
- I am familiar with modern web design concepts such as mobile-first design, cross-browser compatibility, and search engine optimization.
- I have a thorough understanding of OOP (object-oriented programming) with JavaScript as well as JSON knowledge.
- My natural curiosity about how everything works, especially the Web, led me to explore Back-end technologies and learn some SQL and PHP.
- Since 2021 I have turned my focus to furthering my JavaScript and React skills.

Relevant work experience

Junior Web Developer for **Eventogy Ltd** 📍 - Apr 2022 – present / London, UK.

- Maintenance of code for the in-house platform based on clients' requests. Primarily the tech stack is PHP, HTML, CSS, JS, and Git.
- I have managed to implement the Accessibility practices to our main Theme in order to obtain new clients and maintain older ones.
- First Line Technical Support via Zendesk, with +500 tickets successfully resolved.
- As Junior web my role involves several tasks testing.

Freelance Web Developer for **Blubale Ltd** 📍 - Sep 2021 – Feb 2022 / Remote, UK.

- Assistance with the solution of design issues prior to initiating the development process.
- +3000 lines of code in various HTML, CSS, JavaScript and PHP files were written to build a landing page based on the Figma design provided by the employer.
- I managed to shorten the client's forecast by 2 months, enabling the client to obtain the benefits of having the website earlier than expected.

WordPress Developer for **Tour Londres Ltd** [↗](#) - Jun 2019 – Aug 2019 / London, UK.

- It was my responsibility to maintain and optimize the company's website, including updating content, styling, and adding new plugins to improve the efficiency of the web.

QA Junior Tester for **Amelco UK Ltd** [↗](#) - Oct 2018 – Apr 2019 / London, UK.

- Being a member of a SCRUM development team using an Agile methodology requires me to communicate effectively with a team of designers, engineers, and clients on a daily basis.
- Testing site on dozens of devices using 5 different browsers to ensure compatibility and responsiveness across browsers.
- Several different projects gave me the opportunity to resolve +500 Jira tickets and create about 200 bug reports.
